

Bardie is

# a carpenter

## CAN'T

catch a ball or keep her toolbelt organised

## LOVES

solving problems and using her hands to bring a vision to life

## CAREER

qualified carpenter and site manager

## STUDIED

Certificate III in carpentry and joinery at TAFE

## EXPERT ON

working with people to bring their dreams, visions and needs into reality.

## WANTS TO

create a healthier, safer and better industry for everyone

## CAN

tear up the dance floor and solve problems

## AT SCHOOL

enjoyed earth and environmental sciences and maths

# Meet Bardie Sommerville

## What do you do?

I'm a qualified carpenter and site manager.

## How did you get into that job?

I did an apprenticeship with TAFE NSW to get my Cert III in carpentry & joinery.

At school I loved Earth and Environmental Science and Maths. I have come to appreciate Maths more and more throughout my career. I'm glad I did it in years 11&12 as it's not mandatory.

When I was 18 and finished my HSC I was accepted into the National Art School in Sydney. So, I moved from my hometown Lismore down to Sydney to study a Bachelor of Fine Arts.

While I was studying (as all uni students do) I needed money so I got a job working in bars... I hated it. My dad who lived in Sydney called me and offered me a job as a labourer for the company he worked for. I thought I may as well have a crack.

I knew nothing about trades. All I had was a country work ethic. I hated it at the start. I don't think I quite understood the industry or men (I was raised by a single mum and just with one other sister). As I came to learn more I began to love it and wanted to know and understand everything I could. I fired off my first nail gun and that was it. I was hooked!

I had the choice to enter my final year of uni or start my apprenticeship. I started my apprenticeship and have never looked back.

## What do you love about your job?

- Using my hands to bring a vision to life
- Problem-solving
- Creating incredible projects
- Working with great people

“

**Without trades,  
the world  
stops moving.**

**How does your job help people/the community/the world?**

At a basic level my job supplies people with structures. An an advanced level my job allows me to work with families and individuals to bring their dreams, visions and needs into reality. Without trades, the world stops moving.

**What are two things you're not good at?**

1. Catching a ball
2. Keeping my tool belt organised

**What are two things you are good at?**

1. Problem solving any issue
2. Creating an enjoyable atmosphere on and off site
3. Tearing up a dance floor (this is a bonus one)

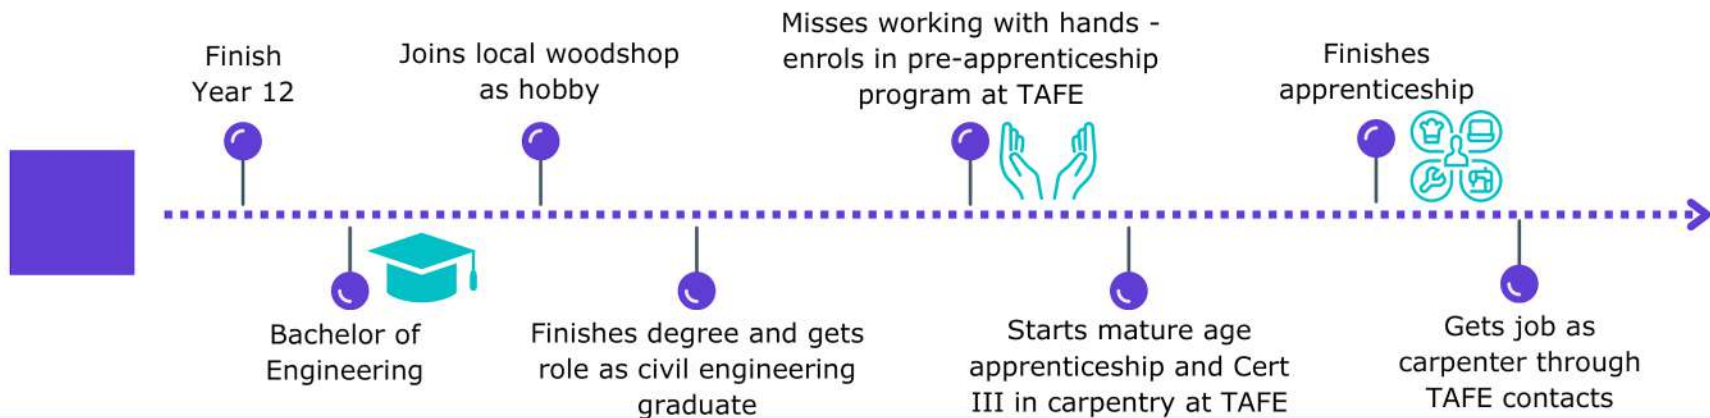

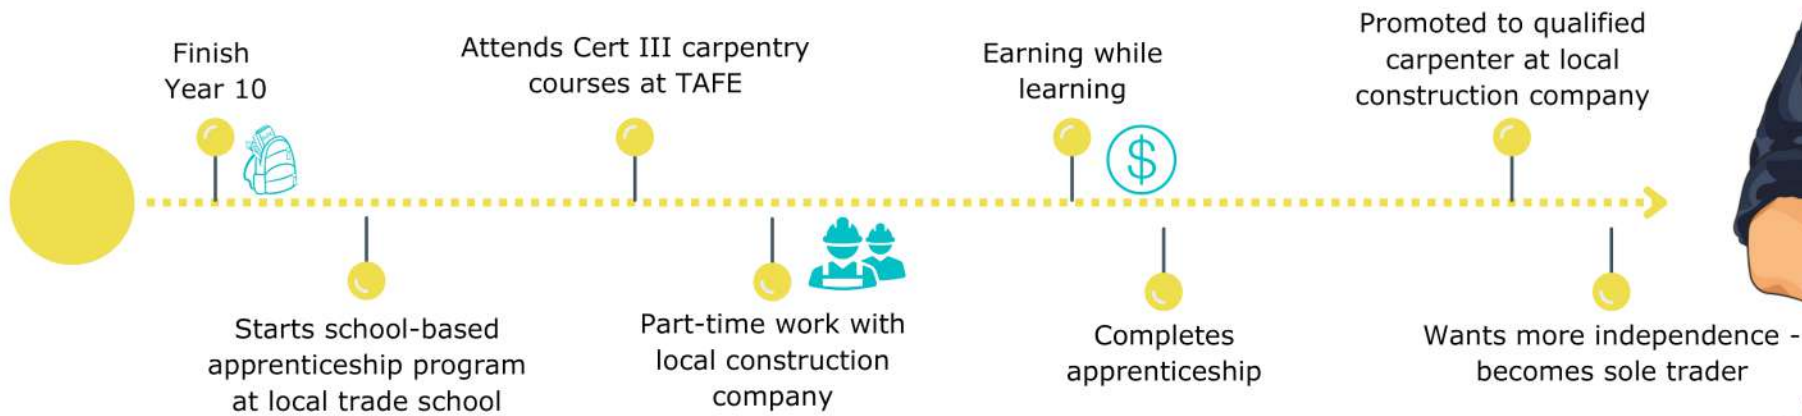

**What makes you happy (outside of work)?**

Reconnecting with myself and my community, and spending time doing outdoor activities like yoga, swimming at the beach, running and bushwalks.

**Where do you want your career to take you?**

There are many avenues a trade can take you down and my career has already brought me so far. I want to continue to learn, create beautiful projects and work with incredible materials. But most of all I want my career to continue to help me work with purpose and intent for those in the industry now and in the generation to come. Creating a healthier, safer and better industry as a whole is what I'm passionate about.

## Carpenter career pathways

Find out more at [www.futureyouaustralia.com.au/resources/#other/](http://www.futureyouaustralia.com.au/resources/#other/)

# Capability Convos

Australian Curriculum V9.0 links for Years 3 to 7

**English**

- Language
- Literacy

**General Capabilities:**

- Critical and Creative Thinking
- Personal and Social Capability
- Ethical Understanding
- Literacy

**Learning outcomes:**

All students will be able to:

- identify some likes, dislikes, strengths, abilities and/or interests when showing a personal preference
- acknowledge that people have different needs, emotions and abilities

In addition, some students will be able to:

- describe the ways they are connected and can contribute to their community groups

**Format**

- Interactive game with 10 questions
- Easy to play
- Read about Bardie's job and journey with the class
- Print the questions
- Play the game
- Modify or include new questions based on students' needs

Scan this QR code to find out more about me.

**Instructions for students**

Line the class up in two lines facing each other to form pairs. Ask the first question. Once each pair has discussed it, get one line to move one person to their right. The person at the end runs around to the other end of the line. Then you ask the next question and repeat the process until all the questions have been asked.

# Bardie Carpenter

## Question 1

What do you think is interesting about Bardie's career?

## Question 2

What skills does Bardie have that you also have, and does she have any skills you don't have that you would like to have?

## Question 3

Why do you think it's important to find a career that suits your skills and personality?

## Question 4

How are your interests and hobbies similar to Bardie's career?

## Question 5

How do you think Bardie's career contributes to society?

## Question 6

What sort of problems do you think Bardie might have doing this job in a rural or remote location?

## Question 7

How much maths do you think Bardie uses in her job? Can you think of five examples of when she would use maths?

## Question 8

What tools or technology do you think Bardie would use at work?

## Question 9

How important in Bardie's work is teamwork and communication? Think of an example.

## Question 10

What do you think would be the biggest challenge in pursuing a career as a carpenter?

# Comprehension Questions

Australian Curriculum V9.0 links for Years 3 to 7

English  
• Literacy

General Capabilities:  
• Literacy

## Learning outcomes:

All students will be able to:

- Identify that all people have strengths and weaknesses
- Actively think about what is happening in various texts as they read them
- Apply comprehension strategies to different media formats

In addition, some students will be able to:

- Identify different reasons for doing different jobs

## Instructions:

- Format/print the students' question sheets (or load them onto school LMS) and direct students to a copy.
- Read the questions as a class to start, discussing any meanings
- Discuss with the class strategies for being able to answer the questions as they read about Bardie
- Read Bardie's questionnaire and 'Day in the Life' as a class, encouraging students to answer questions as you go

Adaptation note: Questions can be modified on the PDF to meet students' needs or learning focus areas in your classroom

## Comprehension questions

1. Name three things Bardie is good at.
2. And two things Bardie CAN'T do.
3. What qualifications does Bardie have?
4. What four things does Bardie love about her job?
5. What work did Bardie do when she first started her university degree?
6. What made Bardie switch from a Fine Arts degree to an apprenticeship?
7. How does Bardie's job help people at an advanced level?
8. What is Bardie passionate about for her future?

Scan this QR code to visit my page

Answers:

1. Solving problems, creating an enjoyable atmosphere on the worksite, and tearing up the dance floor.
2. Catch a ball and keep her tool belt organised.
3. Certificate III in Carpentry and Joinery
4. Using my hands to bring a vision to life, problem-solving, creating incredible projects and working with great people
5. Worked in bars
6. She worked as a labourer and really enjoyed it so much that she changed.
7. Bring their dreams, visions and needs into reality.
8. Creating a healthier, safer and better industry

# Carpenter

Student name: \_\_\_\_\_

## Comprehension Questions

Name three things Bardie is good at.

- 1.
- 2.
- 3.

What work did Bardie do when she first started her university degree?

What made Bardie switch from a Fine Arts degree to an apprenticeship?

Name TWO things Bardie can't do.

- 1.
- 2.

How does Bardie's job help people at an advanced level?

What qualifications does Bardie have?

What four things does Bardie love about her job?

- 1.
- 2.
- 3.
- 4.

What is Bardie passionate about for her future?

# Carpenter/ Site Manager

**Bardie** is a qualified carpenter and site manager who loves problem-solving and working with her hands. After becoming a labourer while studying for a Bachelor of Fine Arts, Bardie discovered a flair for carpentry and decided to pursue an apprenticeship. Find out more:

## 5 reasons why you should do this job

- 1** You get to build really cool stuff
- 2** Work with all sorts of tools and gadgets
- 3** Solve puzzles
- 4** You get to work outside
- 5** Help others

### 3 STEM skills required for this job

Critical thinking

Mathematics

Problem solving

### Subjects to develop these skills

Science, Mathematics, Digital Technology

Mathematics

Design and Technologies, Digital Technology

# An example of a day in the life of a carpenter

- 5.00am** I greet the morning sun with a sense of purpose, a habit formed from my years as a carpenter. Before I start my day I make a strong cup of coffee and check the weather forecast knowing that even a hint of rain could disrupt our progress at the build site.
- 5.15am** Time for breakfast before I get dressed in my work pants and work shirt – these are long to protect me from splinters and the sun. I grab my steel-capped work boots so my toes are protected if I drop something heavy, and my toolbelt. I LOVE my toolbelt. It carries all my essentials, such as my hammer, tape measure, pencils and more.
- 5.45am** With another coffee in my hand I set off for the build site where I'm part of an exciting project: constructing environmentally friendly duplexes. It's a job that goes beyond carpentry. It's about helping people build their homes in a sustainable way.
- 6.30am** The day begins with the whole team reviewing our project plan and consulting the architectural blueprints. Here, STEM skills come into play. We calculate load-bearing capacities, analyse structural integrity and ensure that the eco-friendly materials we use are both durable and energy-efficient. Carpentry, in this context, is a blend of art and science.
- 10.00am** As the morning progresses, I'm in my element. Once I grab my safety goggles, dust mask and knee pads I get to work measuring, cutting, and assembling wood with precision. Each piece I work on is a contribution to these sustainable homes so I ask some of the more experienced carpenters to check my work. They're always happy to lend a hand and offer some guidance.
- Midday** Tools down on the site and we all take a break. Lunch is fun on the work site. We all get to have a laugh and recharge. I enjoy some leftovers from last night. It's important I eat food that gives me enough energy for the afternoon ahead.
- 1.00pm** It's time to focus on the fine details that make these duplexes environmentally friendly. I support the team with the installation of the energy-efficient windows and use this opportunity to learn more about sustainable materials all while maintaining a keen eye for precision and quality.
- 3.00pm** I help clean up the build site and secure the tools. Safety and organisation are important in construction to minimise waste and maximise efficiency.
- 5.00pm** Time to switch gears. I head to the gym for a workout because being fit is important in my job. A workout routine keeps me fit and also sharpens my problem-solving skills which I apply at work.
- 6.30pm** I meet up with friends for dinner. We share stories, laughter, and I talk about all the incredible things I have been learning about sustainable living. My friends are all ears – the environment is really important to all of us.
- 8.00pm** I get home and do some sketching of design ideas for future sustainable projects. I apply all the knowledge I learnt today at work to help me design innovative and eco-friendly housing solutions. One day I want to have my own business, building sustainable, beautiful homes.
- 9.00pm** I collapse into bed. My body and my mind are both happy, but exhausted and they need some serious rest.

## Answers

### Let's reflect

Were any of these words new to you? Look them up and find out what they mean.

Which of these skills do you think you are best at, or would like to get better at?

1. \_\_\_\_\_

2. \_\_\_\_\_

3. \_\_\_\_\_

Can you think of anything else Bardie might need to do her job?

\_\_\_\_\_

Meet Bardie. She's a carpenter who loves bringing people's visions to life. Fill in the bubbles with 5 STEM (Science, Technology, Engineering and Mathematics) skills she uses in her job. Which of these skills do you think is most important? Which do you think would be the hardest to develop? When you've thought of the skills, colour in the rest of the image.
